CAREER OBJECTIVE

Highly motivated BCA student passionate about software and application development. Seeking opportunities to utilize technical skills, enhance problem-solving abilities, and contribute to innovative projects while growing as a software professional.

PROJECTS

Jarvis Voice Assistant

- Developed a voice-controlled assistant for automated tasks such as opening applications and fetching information.
- Implemented speech recognition and command processing to improve user interaction and automation efficiency.

Traffic Management System

- Designed a real-time system to monitor traffic flow and reduce congestion.
- Utilized real-time data analysis to improve traffic control efficiency and enhance road safety.

AI Resume Builder

- Built an AI-based system to analyze resumes and calculate ATS scores.
- Evaluates keywords, skills, formatting, and job-role relevance to improve ATS compatibility.

INTERNSHIP

Web Development Intern

- Completed a 1-month internship focused on web application development.
- Worked with HTML, CSS, JavaScript, and React.js to design and develop responsive web pages.
- Implemented reusable UI components and followed best practices for clean and maintainable code.
- Collaborated on improving website performance and user experience.
